This policy has been reviewed by the Board at its meeting held on 22/07/2014.

Policy on Client Code Modifications and Error code

1. The modification of client code is to be done, only in exceptional cases and not as a routine one.
2. The reason for modification has to be ascertained and analyzed and genuineness is to be established and also its impact on the clients should be studied before the modification.
3. Normally as a principle, other than for punching errors and relatives accounts, no modification of client codes will be allowed.
4. Therefore, it is imperative that the issue should be reported to the senior level Manager/Director and only with his/her approval, the modification should be carried after being satisfied that it is genuine, the same is required to be done to protect the interests of the client.
5. Training program should be conducted to all the Dealers and they should be explained how code modifications can be misused and what steps should be taken to avoid the same. It should also be explained, that code modifications should not be encouraged to the clients except for cases like 'punching errors / relatives accounts'.
6. A register is to be maintained for recording all the code modifications with details like error client code, correct code, scrip name, quantity, client name, the name of the terminal ID where the order is punched, the explanation of the Dealer/Branch Manager, the 'analysis / study' on periodic basis of the authorised Manager and his approval/disapproval for modification.
7. An error code E999 has been created. Modification which are not approved by the managing authority , which are not in interest of clients and which cannot be modified as per guidelines issued by SEBI/Exchange are transferred to error code. The position will be immediately liquidated on the same day.
